

Shaikh Mahboob

720-816-8601 | shaikhm357@gmail.com | github.com/shaikhm357 | [linkedin Profile](#) | [Portfolio](#)

Full-stack developer with 4+ years building enterprise SaaS platforms across InsurTech and FinTech — spanning multi-tenant architectures, dynamic form engines, subscription systems, and LLM-powered workflows. Deep hands-on experience across React, Angular, Node.js, and PostgreSQL, with a consistent track record of owning complex features end-to-end in fast-moving product teams.

TECHNICAL SKILLS

Languages: JavaScript (ES6+), TypeScript, Python, SQL

Frontend: React, Redux, Angular, RxJS, TanStack Query, OnPush Change Detection, SSE Streaming, HTML, CSS

Backend: Node.js, Express, Fastify, FeathersJS, Prisma, BullMQ, Socket.IO, REST APIs, Microservices

Databases & Caching: PostgreSQL, MongoDB, Redis, Pinecone

Auth & Payments: Logto, Keycloak, OIDC, OAuth2, JWT, SSO, RBAC, Razorpay

AI & Automation: GPT-4, Gemini, OpenRouter, LangChain, Camunda 8, Claude Code

DevOps & Tooling: Docker, AWS, Nginx, GitHub Actions, CI/CD, Jest, Maestro, Git

EXPERIENCE

Sr. Software Developer

Sep 2025 – Apr 2026 (7 mos)

AdsCult

Mumbai, India

React, TypeScript, Node.js, Express, PostgreSQL, Prisma, Redis, Docker, AWS, Socket.IO

- * Architected a **multi-tenant SaaS** will/assets platform — **role-aware React UI** with **memoized permission checks**, **Logto OIDC** authentication, **RBAC**, dual **Prisma** schemas, and a clean modular API layer.
- * Designed a **schema-driven dynamic form engine** with **controlled component state**, **conditional field visibility**, **drag-and-drop reordering**, and a **visual navigation builder** — cutting developer dependency for every new data workflow.
- * Owned the **full subscription lifecycle** on **Razorpay** — **tiered feature gating**, **mid-cycle proration**, **webhook idempotency**, coupon validation, and background jobs handling trial and renewal.
- * Shipped a **production RAG chatbot** with **SSE token streaming**, **optimistic UI**, **Pinecone vector search**, **OpenRouter multi-model fallback**, per-user history, and an **admin-managed knowledge base**.
- * Hardened the platform with **AES-256-GCM encryption**, **Redis rate limiting**, **Socket.IO** notifications with **selective re-render guards**, and a **multi-stage CSV pipeline** with **SSE progress UI** and **row-level deduplication** — shipped clean through **CI/CD**, **Docker** multi-stage builds, and **Jest + Maestro E2E** coverage.

Software Developer

Alwrite

Mumbai, India

Angular, TypeScript, Node.js, Express, MongoDB, PostgreSQL, Docker, AWS, GPT-4, LangChain

- * Led development of a **B2B SaaS underwriting platform** across Health, Marine, and Property insurance — **Angular reactive forms** with **lazy-loaded modules** on the frontend and **schema-driven APIs** on the backend, together powering a **dynamic form builder** that let business teams own their workflows without engineering.
- * Drove the **Quick Quote Engine** from UI to API — **OnPush change detection** and **RxJS state management** keeping the interface responsive, **real-time premium calculations** handled cleanly in the **Node.js layer** — taking most of the manual effort out of the quoting process.
- * Owned the full **underwriting lifecycle** across both the **Angular service layer** and **RESTful APIs** — submission, underwriter responses, and **policy binding** — with **MongoDB indexing** and **query tuning** ensuring reliability under production load.
- * Spearheaded **broker onboarding** with a **responsive Angular UI** for bulk imports, **automated field mapping**, and **server-side validation pipelines** — turned a weeks-long manual process into a clean, repeatable day-one setup.
- * Championed **LLM-powered workflows** using **GPT-4**, **Gemini**, and **LangChain** — surfaced through **Angular document interfaces** on the frontend and **automated triage pipelines** on the backend — delivered iteratively across **Agile sprints** with product and QA.

EXPERIENCE (CONTINUED)

Software Developer

Jul 2021 – Oct 2023 (2 yrs 3 mos)

Finclusion Solutions Pvt Ltd

Mumbai, India

React, Redux, Node.js, Fastify, FeathersJS, Microservices, Keycloak, Camunda 8, Docker

- * Joined as a fresher and gradually took **full-stack ownership** across core insurance verticals — **React Redux** with **connected component architecture** on the frontend, **Node.js microservices** on **Fastify** and **FeathersJS** on the backend, together covering Health, Life, and General insurance end-to-end.
- * Built **dynamic form services** across the full stack — **controlled React components** with **Redux form state** on the UI side, **configurable booking APIs** on the backend — keeping **policy-specific data capture** flexible and completely decoupled from core application logic.
- * Engineered **data transformation layers** mapping internal models into client-specific payloads and a **centralized API gateway** with clean **error handling**, **retry logic**, and consistent **response contracts** across insurer and regulatory integrations.
- * Configured **Keycloak IAM** across the platform — **token-aware React routing** and **permission-gated UI** on the frontend, **SSO** and **RBAC enforcement** across microservices on the backend — giving every service a single **trusted identity layer**.
- * Shipped an **MVP for claims and underwriting automation** on **Camunda 8 BPMN** — **React workflow dashboards** showing live process state on the frontend, **backend orchestration** letting non-technical teams adjust approval flows without code — containerized and rolled out across environments with **Docker**.

PROJECTS

<https://myecom-1cz0.onrender.com/E-Commerce Platform> | *React, Node.js, Express, MongoDB, Razorpay*

- * Full-stack storefront with **React cart state**, **product catalog**, **JWT auth**, and a complete **Razorpay checkout** flow from order creation to payment confirmation.

<https://dev-camper.onrender.com/DevCamper> | *Node.js, Express, MongoDB, JWT*

- * **RESTful API** for bootcamp discovery with **role-based auth**, **enrollment flows**, **resource ownership** guards, and a clean **layered service architecture**.

EDUCATION

Mumbai University

Bachelor of Science in Information Technology (BSc IT)

Mumbai, MH, India

Jul 2022 – May 2025

Mumbai University

Diploma in Mechanical Engineering

Navi Mumbai, MH, India

Jul 2016 – May 2018
